Technology with a human touch

IT'S NOT SIMPLY A.I.  
**IT'S H.I!**

The insulin management  
system that transforms  
artificial intelligence into  
**Human intelligence!**

# DreaMed Advisor Pro Learns, Analyzes, and Optimizes

DreaMed Advisor Pro gets to know the habits, needs and glucose patterns of each person with diabetes (PWD), with historical and real-time data from diabetes management tools such as insulin pumps, glucose monitors, diet and personal information logs, and more. With unique, cloud-based adaptive artificial intelligence, Advisor Pro analyzes this

wealth of information and progressively refines its understanding of each case over time - emulating the way expert endocrinologists actually evaluate the people they treat.

**Complex data becomes actionable, real-time insights for personalized insulin treatment recommendations – which is the key to optimal health outcomes.**

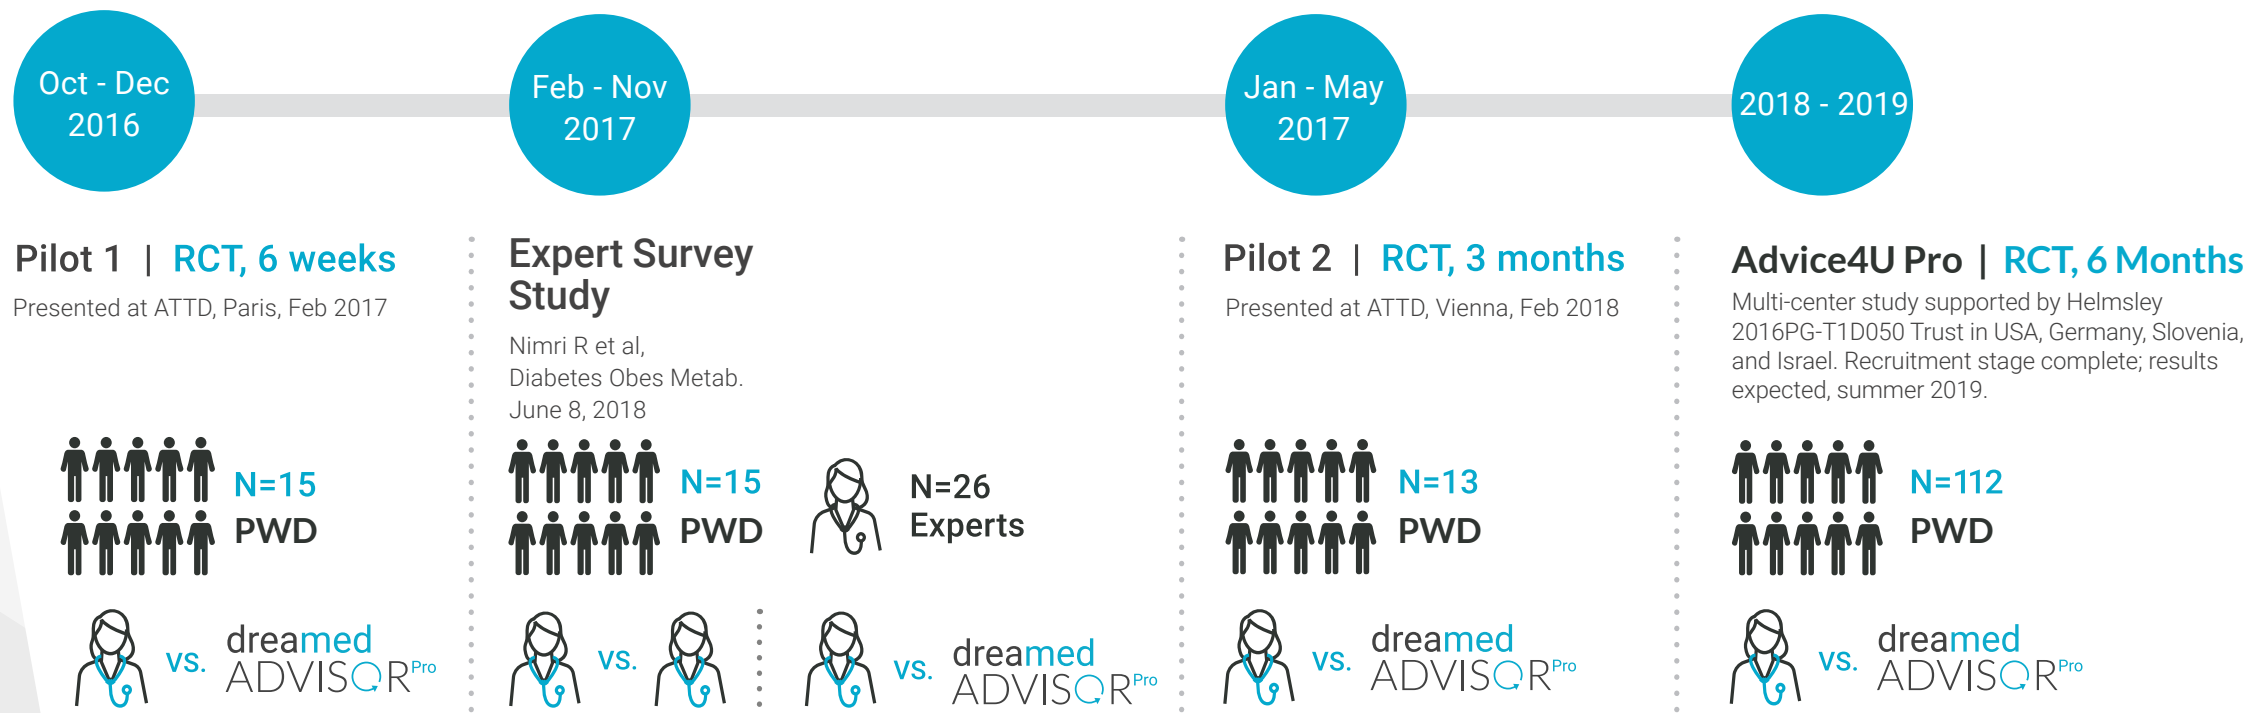

## DreaMed Advisor Pro - The Clinical Evidence Is In

### Pilot clinical studies show:

- Advisor Pro is statistically in agreement with expert physicians to the same degree they are in agreement with each other.
- Advisor Pro is as good as expert diabetologists in controlling glucose levels.

**DreaMed Advisor Pro is like a tireless, full-time insulin management consultant.**

# ADVISOR<sup>Pro</sup>

Technology with a **human touch**

## Easy

Advisor is a physician friendly tool created by top endocrinologists to help simplify your treatment decisions.

---

## Fast

Advisor allows you to turn the mass of rich and revealing glucose/insulin data streams into insulin treatment and behavior modification recommendations instantaneously.

---

## Comprehensive

Systematically analyzes complex insulin and glucose patterns to immediately detect critical events for just-in-time medical intervention.

---

## Proven

Powered by an algorithmic intelligence engine unsurpassed by experts in a head-to-head trial

**Advisor assures you make the expert insulin management decisions your patients need.**

THE EVOLUTION OF DIABETES CARE - **DELIVERED AT THE SPEED OF LIFE**

---

## About DreaMed

Founded in 2014, DreaMed Diabetes develops healthcare solutions and decision-support tools for the optimization of therapy for people with Type 1 and Type 2 diabetes. The company is bringing glycemic control to people everywhere, with personalized medicine that improves their quality of life and lowers their overall treatment costs. DreaMed products are currently in use in leading clinical centers in the European Union and the United States.
